Lot 32	66 / N&K	Cream	Bull Bred / Bull Due 3/5
Lot 33	67 / 5223	Cream	Bull Bred / Sex Unknown Due 3/25

The heifers were given a reproductive tract score, Ultrabac 8, Bovi-Shield Gold FP 5 L5 HB and dewormed prior to breeding season. They were synchronized and AI bred on 4/22/26, then pasture exposed to two Red Angus calving ease bulls purchased from Hueftle Cattle Co. in Cozad, NE. These bulls, HXC 4412M (CED: 14 / BW: -4.1) and HXC 4439M (CED: 17 / BW: -5.2), were specifically selected for their superior calving ease genetics. Heifers were pregnancy checked on 7/27/2026. Heifers that settled AI are due 1/30/2027. Please remember first calf heifers may calve one to two weeks prior to their due date. Ultrasound data is very accurate, but we do not guarantee these preliminary predictions.
